PROFESSIONAL SUMMARY

Data & Operations Analyst | Cloud Data Architecture & Analytics Specialist

Results-oriented Data & Operations Analyst with a strong background in quantitative analysis, cloud data concepts, relational database management, and remote operations. Highly proficient in leveraging SQL, Python, Power BI, Advanced Excel, and foundational Azure Cloud Services to execute ETL processes, perform exploratory data analysis (EDA), build automated reporting pipelines, and deliver interactive dashboards. Adept at translating complex datasets into actionable business intelligence and streamlining cross-functional administrative workflows within distributed environments.

CORE COMPETENCIES & TECHNICAL SKILLS

- Data Analytics & Data Science:** SQL Querying, Python (Pandas, NumPy, Matplotlib), Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP, Data Modeling, Nested Formulas).
- Data Visualization & BI:** Power BI, DAX Measures, Interactive Dashboards, KPI Tracking, Executive Summary Reports.
- Database Management & Cloud Foundations:** Relational Databases (3NF Schema), Power Query ETL Pipelines, Data Cleaning, Data Integrity, Azure Data Concepts (Storage, Modern Data Warehouse Workflows, DP-900).
- Operations & Agile Collaboration:** Process Automation, Client Relationship Management, Lead Generation Tracking, Asynchronous Operations (Slack, Zoom, Cloud Spreadsheets).

PROFESSIONAL EXPERIENCE

Administrative Assistant **June 2026 – Present**
Stitches Africa | Remote / Lagos, NG

- Coordinate day-to-day administrative operations and cross-functional communications across a fast-paced, remote team environment.
- Clean, transform, and manage complex client and sales datasets across cloud spreadsheets, standardizing data integrity and improving reporting accuracy by 15%.
- Maintain dynamic, automated tracking systems for lead generation and business outreach, monitoring performance metrics for 50+ high-value corporate accounts.
- Leverage Slack, Zoom, and unified cloud environments to facilitate seamless asynchronous team handoffs and operational workflows.

Data & Operations Analyst Intern **July 2024 – November 2024**
Nigerian Ports Authority (NPA) | Lagos, NG

- Designed and maintained a normalized logistics database schema (8 tables in 3NF) to systematically track global shipments, courier routes, and terminal payments.
- Authored 18+ complex SQL queries (Joins, Aggregations, Subqueries) to evaluate courier delivery metrics, detect revenue leakage, and measure logistics bottlenecks.
- Optimized data ingestion workflows by identifying and resolving structural discrepancies, missing values, and formatting errors using Advanced Excel and formulas.
- Collaborated with port operations leadership to translate raw, high-volume shipping datasets into daily executive dashboards and actionable operational summaries.

TECHNICAL PROJECTS PORTFOLIO

Sales Analytics & Executive Dashboard / *Power BI, Power Query, DAX*

- Architected an interactive Power BI dashboard tracking quarterly sales performance, regional market trends, and customer segment profitability.
- Ingested and structured multi-source CSV datasets using Power Query, writing custom DAX measures to compute dynamic margins and real-time operational KPIs.

Customer Churn & Attrition Analysis Platform / *Python, Pandas, Matplotlib, EDA*

- Analyzed 7,000+ customer records using Python to perform Exploratory Data Analysis (EDA) and identify primary churn drivers and attrition risks.
- Formulated data-backed retention strategies based on customer contract length, payment methods, and account tenure to reduce month-to-month attrition.

Logistics & Lead Generation Optimizer / *SQL, Microsoft Excel, Operations Modeling*

- Queried relational databases to identify top-performing business categories, exporting aggregate data to Excel to construct historical trend visual models.
- Developed targeted lead-tracking metrics across 50+ small businesses, implementing outreach optimization workflows that directly converted 5 high-value pipeline leads.

JOB SHADOWING & SIMULATIONS

Virtual Data Analytics & Investment Banking Simulation

October 2024

JPMorgan Chase (via Forage) / Virtual

- Evaluated corporate transactional profiles to identify strategic investment opportunities based on financial data modeling and operational metrics.
- Constructed custom financial and data models, testing baseline projections and adjusting input variables against dynamic market shifts.
- Developed concise, 2-page executive data summaries integrating visual database charts and revenue performance analysis for senior decision-makers.

EDUCATION & CERTIFICATIONS

Bachelor of Arts in International Relations

2022 – 2025

West African Union University

Certifications & Azure Cloud Coursework:

- Professional Program in Data Analysis (SQL, Python, Excel, Power BI) | Aptech
- Azure Data Fundamentals (Cloud Architecture) | Microsoft Azure Data Concepts, Storage Services, and Analytical Workflows
